

Here is the latest as of March 30th:

Last fall, the FDA and CDC both **recommended** Pfizer & Moderna Covid Vaccine booster shots for people 12 & older. The first booster was recommended to be given at least 5 months after the primary series of either vaccine was completed.

Both federal agencies have now **authorized** a second booster shot of Pfizer or Moderna vaccines for adults 50 years of age and older. This authorization allows administration of the 2nd booster as soon as 4 months after the first booster.

We are administering these boosters by appointment. Please refer to our website www.remedydrugrx.com or give us a call for in-store appointments.

Please contact us with questions about Johnson & Johnson Covid Vaccines or boosters for immunocompromised patients.

The FDA & CDC have approved a pediatric dose of Pfizer Covid Vaccine for children ages 5-11. Remedy Drug is not providing the pediatric Covid vaccine at this time.

We will continue to provide updates as information becomes available.
